

NARCY CARRERA STANDS OUT IN SINGAPORE

Representing the CBP, student Nancy Carrera from 12°B traveled on October 3 as part of the Panamanian delegation to the Robotics World Cup, also known as the First Global Challenge 2023, from October 7 to 10. With the participation of delegations from more than 190 countries. Nancy achieved outstanding participation and, more importantly, a great personal experience.

Alexandra Mansfield interviewed Nancy, who told us about our representative's experience in Singapore.

EDITORIAL

Another school year is about to end, and this is the last edition of CBP News in 2023.

This first year on the CBP News board, we worked hard with our students to periodically bring them this newsletter with the most important things that happened on our educational campus.

This 2023, was a year of learning and many challenges, but thanks to the effort and collaboration of all of you, we produced our school newsletter.

Some of you will take different paths, seeking other goals in life, but what you have learned will stay with you; those who remain will be able to apply their knowledge and avoid repeating the same mistakes that could have been made at one time, mistakes that they also learned from.

As we approach the end of this school year, we will notice silence in our classrooms and hallways, but it will be for a brief moment. At the beginning of the new 2024 school calendar, the laughter, games, and competitions will return, and with them, the opportunity to once again inform the school community about everything that happens at our prestigious school.

We thank teachers, editors, photographers, and designers for your work and for making CBP News a reality.

WE PAY TRIBUTE TO THE HOMELAND

In the month of the Homeland, our students paid their respects to our beloved nation on November 1st in all grades of our institution.

PANAMA

WAX MUSEUM

Have you ever been to a museum?

Museums always teach us about the history of our past and expand our general cultural knowledge by showing us the lives of our ancestors. The CBP wax museum was created to teach us about the biographies of people who marked history, and thanks to them, we have important knowledge today.

What makes the CBP Wax Museum different from everyday museums?

As you already know, dear readers, everyday museums provide information about the past to know what the world was like before we lived and what happened in those times. Museums are always based on the most fundamental facts of history; instead, the wax museum is based on learning more about the biographies of historical people.

Interview with Professor Ángel González

What was the purpose of creating a wax museum in C.B.P.?

Professor Ángel told us the following: the purpose of creating a wax museum is to make students know more about the great leaders in the fields in which they specialized and how they came to achieve their goals and objectives, although the primary purpose was that it would not be like the science fairs of previous years in which students identified them with stress and scientific projects; We, on the other hand, wanted to show how these great scientists were able to break through different studies to become leading figures in science, it was also to educate about the importance of science and promote the works of the great Panamanian scientists.

What were the methods for choosing the topics?

Well, I based it mainly on choosing students who I knew were very fluent and who in some way were interested in science; I used different criteria...some were chosen because they physically looked very similar to the natural scientist, others because I knew they were interested in some of the subjects and others. After all, I based it on the fact that they were good and had high standards for speaking English. Justo Reyna and Víctor Rivera were also interviewed. They expressed their feelings about being part of the project; they told us it was a wonderful experience and would provide more science knowledge to the school.

HEART'S DAY

The Azairus promotion ends the school year with its last activity, Hearts Day (Azairus' Friendship Day), last Friday, October 6. For an entire month, the graduates took requests from students, teachers, and school staff to bring all school members a little joy and happiness. The graduates sold chocolates, roses, carnations, delicious decorated cookies, and incredible arrangements of flowers, cups, and stuffed animals.

Here are some of the questions we asked the organizers of all this, Alejandra Norato and Adrián Contreras, as those in charge of the Azairus promotion and the logistics team of the activity to further discover the secrets behind this activity:

Why did you decide to change the name of the activity from Friendship Day to Heart's Day?

We changed the activity's name to Heart's Day because we wanted it to be more personalized, different from what is done yearly, and a new version. Azairus' goal this year was to revolutionize; we wanted to do things differently and give a 360° tour of our activities.

What does the Azairus promotion take away from this activity and everything learned?

From this experience, we have achieved a higher level of leadership. We have learned punctuality, responsibility, and commitment, which we will apply in our work. We are also very grateful for all the work and effort put in by the graduating class. From day 1 of taking orders, we observed each one's commitment to exceeding our goal for this activity.

CBP STUDENTS STAND OUT IN VARIOUS EVENTS

Colegio Bilingüe de Panamá students stood out in different events and sports competitions during the last few months. Proof of this is our student Lilian Araúz Montano, who participated in different events, achieving the following distinctions:

- The Panamanian Space Sciences Olympiad, from June 22 to 24, achieved the Gold Medal.
- National Physics Olympiad obtained the Gold Medal on June 17, July 8, and 29.
- Ibero-American Physics Olympiad from September 23 to 30, obtaining Honorable Mention
- Astronomy and Astronautics Olympiad from October 9 to 13, also achieving an Honorable Mention.

Luzmar Villanueva, representing 10C, competed in Rhythmic Gymnastics for Panama at the Central American Games, and emerged victorious with a Gold medal.

It is the first time that Panama wins a gold medal in Rhythmic Gymnastics.

CONGRATULATIONS TO OUR STUDENTS ON THEIR DAY.

On October 27, Colegio Bilingüe de Panamá celebrated the achievements of our students with a touching tribute. Even though they were at home, our students could participate virtually and reminisce about the memorable moments of the school year.

Student DAY

TRACK AND FIELD INTER-SCHOOL COMPETITION

On October 21, the Athletics team participated in the San Agustín Track and Field competition, winning:

- 3 Bronze medals
- 2 Silver
- 5 Gold

SHARLIS HERRERA, CNO 2023 FINALIST

On September 21, Sharlise Herrera, a CBP student of the Azairus 2023 class, qualified for the grand final of the 2023 National Speech Contest. Herrera positioned herself as the first finalist, competing in a semifinal where the 50 best speakers in the country, coming from 16 educational regions, compete to win one of the 15 positions to be trained in the National Speech Contest Academy. Now, Sharlis is in her arduous preparation for the grand finale, which will take place at the Anayansi Theater of the Atlapa Convention Center soon in November.

At CBP News, we had the opportunity to ask Sharlise Herrera a few questions. Read the full interview in the following link.
